Winter Passage

When do reservoir-type juveniles pass dams?

Reservoir-type juvenile

Winter sampling

Implanting radio tag

Tagged 104 fish from November to February

Monitored forebay and tailrace of each Snake River dam through beginning of May

Compiled detection and passage timing information

USGS

Total Detections

LGR forebay	LGR tailrace	LGO forebay	LGO tailrace	LMO forebay	LMO tailrace	ICH foreb
102 (98%)	88 (85%)	41 (39%)	33 (32%)	23 (22%)	17 (16%)	14 (1

Detections Before Bypass

LGR forebay	LGR tailrace	LGO forebay	LGO tailrace	LMO forebay	LMO tailrace	ICH foreb
57 (56%)	48 (55%)	15 (37%)	13 (39%)	6 (26%)	4 (24%)	1

Detections After Bypass

LGR forebay	LGR tailrace	LGO forebay	LGO tailrace	LMO forebay	LMO tailrace	ICH foreb
45 (44%)	40 (45%)	26 (63%)	20 (61%)	17 (74%)	13 (76%)
